

Seasonal Flu Vaccinations Available

Harrison County Home & Public Health has received an unexpected shipment of seasonal flu vaccine. Due to the limited number we have, we will at this time still be unable to hold clinics in each community as we have done in the past. We are however asking individuals who still need to be vaccinated for seasonal flu to call our office to schedule a time to come in. Appointments are encouraged to ensure that the nurse will be available. We can bill insurance only for individuals who have Medicare Part B; otherwise, the cost for a seasonal flu vaccination is \$25. Please call Harrison County Home & Public Health at 712-644-2220 to schedule an appointment.

For those people in the target groups for the H1N1 vaccine, our next clinic will be held December 4, 2009 at the Logan Community Center from 3pm-7pm. More information regarding H1N1 is available at <http://www.harrisoncountytia.org/publichealth/index.html>, or you can call our office at 712-644-2220.
